Karen Neal Painting
Artist Profile

I have always been interested in painting but over the last eight years, although still a hobby, it has become an absorbing passion. Initially I started classes as the local Community centre, then at Whitehorse Arts Association. This exposed me to both traditional and non-traditional ways of working.

Although I enjoy most mediums it is my mixed media work that allows me to express both my love of nature and love of experimenting with different materials and methods.

My work is strongly influenced by nature and the landscape, drawing on nature’s colours, patterns, textures and moods for inspiration. This year I commenced a Diploma of Visual Art and am excited to expand my work into new mediums.
