Simone Dole  Painting
Artist Profile

“I believe living can be a work of art.”

One of the main themes that Simone works with is “Life is never still”. As a mother of an 18 year old, 14 year old 3 year old, as well as a Yoga Teacher....that is the way life feels.

Her work is often related to motherhood and the role of women in contemporary society. The multitude of roles that women play, their duties as mothers, wives, sisters, daughters, workers, lovers and friends. She is driven to discover different ways of expressing these themes. Either through the thrill of lifting the blanket on a new print, spreading paint all over a fresh canvas or discovering new ways to form a 3 dimensional structure.

“In my youth my art was through my passion for drama and dance but as the life journey continues, I have found different ways to express my creativity.” Now living and working on the Mornington Peninsula ,
Simone finds it hard to find time to be creative in between trying to maintain a family both emotionally and financially. She juggles these roles but is passionate about creating, either through print making, sculpture, photography, or painting in various mediums. These along with her children are definitely the fruits of her labour.
